About the Authors

Dr. N. Anandharaman received his B.Tech in Electronics & Communication Engineering, from JNTUH, Hyderabad, M.Tech in VLSI Design from Sathyabama University, Chennai and received his Ph.D degree in electronics & Communication Engineering from Acharya Nagarjuna University, Guntur, Andhrapradesh in 2021. He is having about 14 years of teaching and Research experience. He is currently working as Associate Professor, in Department of E.C.E, **Vignana's Institute of Management and Technology for women**, Hyderabad, Telangana, India. He has a total of twenty Research publications at National/ International Journals, seven conferences, five Patent Publications, and Four Best Academician awards from various International Societies. He is a life member of ANHEI, IASCI, and SOLTTE. His current research areas Low power VLSI and Wireless Communication.

Dr. R. RAMESH BABU received his B.Tech and M.Tech in Electronics & Communication Engineering under Jawaharlal Nehru Technological University Hyderabad (JNTUH), Hyderabad respectively In 2003 and 2008. In 2017 he received his Ph.D from the department of Electronics & Communication Engineering at SRUniversity. He has been teaching in number of colleges for past 12 years and currently working as Head of Department in Electronics & Communication Engineering at **Vignana Bharathi Engineering College, Hyderabad, Telangana, India**. His long and continuous teaching activity includes courses on digital systems. He published more than forty publications in both International and National journals and conferences.

Dr. M. Pavithra Jyothi received her B.E in Electronics & Communication engineering, from Anna University, Chennai, M.Tech in VLSI Design from Sathyabama University, Chennai and received her Ph.D. degree in Electronics & Communication Engineering from SR University in 2017. She is having about 12 years of teaching and Research experience. She is currently working as Associate Professor, in Department of E.C.E, **Shadan Womens College of Engineering and Technology, Hyderabad, Telangana, India**. She has a total of 15 Research publications at national/International Journals, 4 Conferences and 2 Patent Publications. She is a life member of ANHEI and IAENG. Her current research areas VLSI Design, Artificial Intelligence, and Wireless Communication.

Dr. S. Kishore Reddy is currently working as HOD & Associate Professor, Electronics and Communication Engineering, Avanthi Institute of Engineering & Technology, Telangana, India. He is having nearly 15 years of teaching and Research experience, He received his PhD from University of Allahabad, UP, India in the field of VLSI Design and he has received his M.Tech Degree from VLSI Design, CVR College of Engineering, JNTUH, Hyderabad, India. His main research includes signal & image processing, Digital electronics & wireless communications. He has published 43 papers in reputed national & international Journals. He has participated in

different national & international conferences. He is having life memberships of MIAENG, MIACSIT, MISMTE, LMISTE, SMIACSIT, MIAENG, MAIRCC, SMUACEE, MSDIWC, MIIRJC.

About the Authors

Mr. P. Harikrishna received his B.Tech. Degree from JNTU Hyderabad, India in 2006. His M.Tech degree from JNTU Hyderabad, India in 2011. He is pursuing his Ph.D. degree in biomedical signal processing from Vignan University, Guntur. He has 13 years of teaching experience. His primary area of research activity is Signal processing, Neural Network, Low power IC design, and Internet of Things. He has published many research article in referred journals. He is currently working as Assoc.Prof. & H.O.D in the Department of Electronics and Communication Engineering at Vignan's Institute of Management and Technology for Women, Hyderabad, Telangana.

Dr. K. Sateesh Kumar received his Ph.D. degree in Electronics & Communication Engineering from Sri Venkateswara University, Tirupati in 2019. Dr.S Kumar has more than 8 years of teaching and research experience after his M.Tech. He is currently working as Assistant Professor, Department of E.C.E, Sreenidhi Institute of Science and Technology (SNIST), Ghatkesar, Hyderabad, Telangana, India. He has a total of 15 Research publications at International National Journals, 4 Conferences and 1 Patent Publication. He is a life member of ISTE and review for various SCI Scopus Journals. His current research areas are Machine Learning, Remote Sensing, and Digital Image Processing.

Dr. S. Kishore Reddy is currently working as H.O.D & Associate professor, Electronics & Communication engineering, Avanthi Institute of Engineering & Technology, Telangana, India. He is having nearly 15 years of teaching and Research experience. He received his PhD from University of Allahabad, UP, India in the field of VLSI Design and he has received his M Tech Dwgree from VLSI Design, CVR College of Engineering, JNTUH, Hyderabad, India. Abstract:

Most of the minerals and vitamins can be obtained by humans with the intake of fruits. Fruits are very rich in fibre and health-boosting oxidants can be provided by them. With a daily routine of eating fruits, a human can avoid the risk of diabetes, cancer, heart diseases. But these days fruits are being adulterated for the [1] economic and technical benefits. Adulteration is a kind of illegal act of mixing some harmful chemicals into the fruits in order to increase profits. Eating adulterated fruits can lead to chronic diseases diarrhoea, cancer, liver disorder, and heart diseases. Adulteration is a serious threat to the health of humans. Even though the adulteration of fruits is banned, many traders are applying adulteration in the thirst of more profits. It is very difficult to identify the fruits which undergone adulteration with naked eyes. Image processing techniques can be applied for detecting the adulterated fruits. In this paper, A Convolution Neural Network (CNN) with K-means clustering and Bag of words based technique is proposed to detect the fruits which undergone adulteration. Accuracy of 0.94 is achieved with the proposed system.

Keywords: Adulteration, Bag of words (BOW), CNN (Convolution neural Network), Detection, Diseases, Traders, K-Means clustering.

I. INTRODUCTION:

According to the reports, in the entire world there are 2000 types of fruits are available. Fruits are very rich in fibre. Fruits are the main source of minerals and vitamins. Health boosting anti oxidants can be produced by the fruits, which makes a human to fight with many kinds of diseases. [2] An apple daily keeps doctor away which makes an human to be healthy. But these days, thee fruits are being adulterated. Almost every food item in these days is getting adulterated. Adulteration [3] is a process of

IS ENGAGEMENT INFLUENCED BY RESILIENCE? MULTIPLE MODERATOR ANALYSIS CENTRIC TO TN PSU TELECOM EMPLOYEES

Dr Polumuri Lova Kumar

Sub-Divisional Engineer, BSNL-A Govt. of India Enterprise, Hyderabad, Telangana.

Dr. B Nayeema

Asst. Professor, Avanthi Institute of Engineering and Technology, Hyderabad, Telangana.

Dr. N.Ramana Reddy

Assoc. Professor, Avanthi Institute of Engineering and Technology. Hyderabad, Telangana.

Abstract:

Resilience is a significant part of engagement since it permits individuals to recuperate from adverse occasions. Certain individuals are hereditarily inclined to have more significant levels of resilience. Versatile specialists are more fulfilled and connected with at work, and they perform better compared to their less strong partners. The job of resilience as far as developmental persistency, positive emotions predicting employee engagement, and organizational engagement was examined in this research paper. Thus, this underlines the position of resilience in affecting engagement the review was led utilizing Google forms for TN telecom employees of solidarity 364. At first, the analysis found a critical relationship between the two variables, and the model was constructed and validated. Further, the current research investigated the multiple moderations influencing on relationship with the backing of SPSS Process Macros, and based on these discoveries, suggestions, and conclusions are made.

Keywords: Resilience, Engagement, Moderator, Similarity of Age Groups, Family, Employee relations, SPSS Process Macros.

1. Introduction:

The difficulties of the previous year have undermined individuals' physical and mental prosperity, both by and by and expertly. In any case, if workers and their organizations can all the more likely recognize where they presently remain as far as their own physical and psychological well-being, they will be better ready to figure out which moves to make to endure and eventually flourish through current and future difficulties. Before we make a plunge, note that we characterize engagement as the enthusiastic perspective that makes individuals accomplish their best work reasonably, and resilience as the limit of a person to withstand, skip back from and work through testing conditions or occasions.

Where highly engaged employees are committed to an organization's motivation, sure in their meaning of greatness, sure about the help of their partners, and invigorated by their company's future. Interestingly, we assigned those employees who were not completely connected as "simply coming to work." Similarly, through the different things that action and foresee resilience, we had the option to recognize profoundly tough representatives who exhibited organization and the capacity to compartmentalize, had a sense of security, and showed trust in their chiefs' capacities to expect the future, impart, and finish responsibilities. Those workers who were not exceptionally strong were assigned as powerless.

From the past, Waterman and Collard (1994) analyze strength in employees vocations, and portrays it as a labor force associated with ceaseless learning, prepared for reexamination, assumes liability for the profession, and is focused on the organization's prosperity" Rudolph and Repenning (2002) described while others use it to depict authoritative framework execution, liberated from normal or novel disaster. Rudolph and Repenning (2002) described while others use it to depict authoritative framework execution, liberated from normal or novel disaster Besides, May et. al., (2003) mark ethically resilient pioneers as " resilience yet emphatic people that follow their standards and virtues, while confronted with pressures from peers,"

In the Middle of research few scholars like Well-known models of resilience in current hierarchical investigations start from Nelson and Cooper (2007), who described a few issues in general, as an essential reaction to an inexorably unpredictable and dynamic managerial climate, which makes the work environments really exhausting, hostile, unpleasant, and profoundly

OPTIMIZED ROBOT PROCESS AUTOMATED PATH NAVIGATION IN TIME VARYING NETWORKS

ABSTRACT

The interaction between many empty vehicles is a very challenging topic from a theoretical and material point of view, with far-reaching indicators of scientific and commercial mechanical conditions. The difficulty of connecting the fastest time of multirotor UAVs includes pre-defined local routes depending on the equipment requirements. With the proposed solution, collaborative control is performed in the presence of time-varying communication networks, as well as strong temporary issues, such as simultaneous arrival at the desired terminals. The proposed definition solves the problem of time consolidation under the acceptance that trajectory generation and subsequent assembly of algorithms is provided for guaranteed integration conditions. Communication is processed in unexpected ways using the following method and targeted graph. Optimized Robot Process Automation is an algorithm for detecting very short routes, which is used to avoid / detect collisions / congestion in unexpected ways. Without the discovery of a collision, it does not seem to be compatible to avoid a collision because there would not be everything to avoid. The Dijkloyd algorithm is used to find shortcuts in a targeted graph with a positive or negative margin. The Primloyd algorithm is used to find shortcuts in a weighted non-target graph to overcome complexity in matrix coding. In case of overcrowding or collision the whole network is read about to all its contacts. Therefore, communication occurs unexpectedly in a secure way.

Index Terms

Optimization, Path Navigation, Time Varying Networks, Robot Process Automation, Collision.

1. INTRODUCTION

With the proliferation of communication technology and embedded systems, space communications have greatly improved technology. Especially without human intervention, the planes are designed to fly high in space for commercial and surveillance purposes. The Unmanned Aerial Vehicle (UAV) is a type of aircraft with no pilot. Based on systematic data, the UAV can be remotely controlled [1]. In recent times, the automotive autonomous field has a wide range of research programs in the field of Sensor fusion, Multi-agent Liaison, Traffic Planning, Trajectory Production, Task Allocation and Planning and Collaborative Strategies.

The main goal is to completely avoid the pilot from using the UAV and to stay away from plane crashes. When a UAV is moved and controlled by systems built by the Air Traffic Controller (ATR), there are some difficult tasks that need to be done to reduce the distance between the first stop and the last stop. The number of available modes of flexibility may change the direction of the UAV during its boarding time from the normal route is a significant problem [2]. This paper focuses on controlling the existence of time-varying communication networks, as well as strong temporary issues, such as simultaneous arrival at the required final destinations.

The proposed solution solves the problem of time communication under acceptance

Applying Hidden Markow Models to Ontology Based IRS for Coherence

¹Dr Shahebaz Ahmed Khan, ²Y DurgaJhansi

¹Avanthi Institute of Engineering and Technology, Hyderabad,

²Narayana College, Hyderabad

¹saklkyr@gmail.com

Abstract

Abstract: An Information retrieval model occupies a vital position in information extraction platforms. Information retrieval helps the users to retrieve and extract the information from unstructured data sets. It has a set of fast algorithms capable of facilitating the relevance of the documents displayed for the queries searched. To efficiently acquire the documents, the domain based ontology works as more suitable option. Ontology based information retrieval systems can form the information index and also the index of information inference. Ontology based IRS is found with many function in comparison to keyword based retrieval models as these systems neglect the semantic information. Ontology based information retrieval systems sometimes suffer the problems of inaccurate index term frequency. This paper suggests the application of Hidden Markow Models (HMM) to ontology based IRS which can probably provide the ways to form the efficient index with coherence between the terms of the documents for the search query. Hidden Markow Models can help in better conceptualization of the documents for relevancy.

Keywords: HMM, ontology, semantic information, index terms, information inference.

1. Introduction

An Information Retrieval System (IRS) is highly potential software for information retrieval. Information retrieval is a process of extracting the relevant data or documents from the large sets of unstructured data. Information Retrieval Systems can store, organize, evaluate and retrieve the documents from the unstructured data repositories. These systems are particularly meant for extraction of the information from the textual data bases. IRS selects and retrieves the suitable documents for the user queries by applying a matching function with some retrieval status value in return for each document in the collection. Based on type of the data it uses various models, user interaction language, and search methods for the display of the relevant information. There have been probabilistic models, Boolean models, VSMS, binary and non binary independence models to retrieve and represent the relevant information for the user query [1]. These models do not consider the internal relations between keywords and documents but will retrieve the results based on probabilistic estimations.

(57) Abstract :

The field of this investigation relates in Ecology to find the ammensalism effect on Humans on Plants population and Birds population. The Results are examined based on the analytical study of the mathematical model and interacting coefficients between the Humans, plants and Birds. The effects of delay are examined. The present investigation is an analytical study of a three species syn-ecological model which comprises human beings (N1), plants (N2) and birds (N3). Here plants and birds (like ducks and hens) are neutral to each other and humans are ammensal on the both. A time delay is introduced between humans and plants. All possible equilibrium points of model are identified and local stability for each case is discussed and the global stability is discussed by constructing suitable Lyapunov function. For the proposed model we examined local stability at equilibrium points and Global stability. In this examination we identified Fully washed out state, Humans and Plants Washed out state, Humans and Birds Washed out State and Plants and Birds washed out states are Unstable. Further we observed that only Humans washed out state, only Plants washed out state and only Birds washed out states are conditionally stable based on the interacting coefficients. Finally we observed that Co-existent state is globally asymptotically stable. If we introduce the time delay between Humans and Plants, then the Co-Existing state is also conditionally asymptotically stable. And the Delay argument in the interaction of Humans and Plants is significant in the stability analysis. Further, exact solutions of perturbed equations have been derived. The stability analysis is supported by numerical simulation using Mat Lab.

COMPANY PROFILE OF C-DAC

Centre for Development of Advanced Computing (C-DAC) is the premier R&D organization of the Ministry of Electronics and Information Technology for carrying out R&D in IT, Electronics and associated areas. Different areas of C-DAC, had originated at different times, many of which came out as a result of identification of opportunities.

- The setting up of C-DAC in 1988 itself was to built Supercomputers in context of denial of import of Supercomputers by USA. Since then C-DAC has been undertaking building of multiple generations of Supercomputer starting from PARAM with 1 GF in 1988.
- Almost at the same time, C-DAC started building Indian Language Computing Solutions with setting up of GIST group (Graphics and Intelligence based Script Technology); National Centre for Software Technology (NCST) set up in 1985 had also initiated work in Indian Language Computing around the same period.
- Electronic Research and Development Centre of India (ER&DCI) with various constituents starting as adjunct entities of various State Electronic Corporations had been brought under the hold of Department of Electronics and Telecommunications (now MeitY) in around 1988. They were focusing on various aspects of applied electronics, technology and applications.
- With the passage of time as a result of creative ecosystem that got set up in C-DAC, more areas such as Health Informatics, etc., got created; while right from the beginning the focus of NCST was on Software Technologies; similarly C-DAC started its education & training activities in 1994 as a spin-off with the passage of time, it grew to a large efforts to meet the growing needs of Indian Industry for finishing schools.

Dear Sir,

Sub: Industrial visit of our CSE students to C-DAC Request-reg.

Avanthi Institute of Engineering and Technology, is one of the premier Institutions offering varied courses in the domains of Engineering, Technology i.e. B.Tech and M.Tech at Graduation and post Graduation levels respectively and MBA (covering various specializations in Management field) at the post Graduate level.

Management studies need to be aided with more practical exposure to the business world and a wide scope of acquiring advanced knowledge and application possibilities beyond the prescribed syllabus. With this endeavor to provide a learning opportunity for our students, we would like to seek your kind support by permitting our CSE, ECE&EEE II year students numbering up to 281 and 3 senior faculty members accompanying them, to visit your organization for obtaining useful inputs and guidance from the knowledgeable and experienced industrial personnel.

We will be grateful for your kind acceptance of this humble request and will be looking forward to your favorable response.

Thanking you in anticipation of an early and favorable response.

COMPANY PROFILE OF INFOSYS

Infosys Limited is an Indian multinational information technology company that provides business consulting, information technology and outsourcing services. The company was founded in Pune and is headquartered in Bangalore. Infosys is the second-largest Indian IT company, after Tata Consultancy Services, by 2020 revenue figures.

On 24 August 2021, Infosys became the fourth Indian company to reach US\$100 billion in market capitalization. It is one of the top Big Tech (India) companies.

Infosys provides software development, maintenance and independent validation services to companies in finance, insurance, manufacturing and other domains

Its key products and services are:

- NIA – Next Generation Integrated AI Platform (formerly known as Mana)
- Infosys Consulting – a global management consulting service
- Cloud-based enterprise transformation services
- Infosys Information Platform (IIP), an analytics platform
- Edge Verve Systems, which includes Finacle, a global banking platform
- Panaya Cloud Suite
- Skava (now Infosys Equinox)
- Engineering Service
- Digital Marketing
- Block chain

To
The HR Manager,
(HR Dept)
INFOSYS
GACHIBOWLI
Hyderabad.

Dear Sir,

Sub: Industrial visit of our **students to INFOSYS Company**. Request-reg.

Avanthi Institute of Engineering and Technology, is one of the premier Institutions offering varied courses in the domains of Engineering, Technology i.e. B.Tech and M.TECH at Graduation and post Graduation levels respectively and MBA (covering various specializations in Management field) at the post Graduate level.

Both Engineering as well as Management studies needs to be aided with more practical exposure to the business world and a wide scope of acquiring advanced knowledge and application possibilities beyond the prescribed syllabus. With this endeavor to provide a learning opportunity for our students, we would like to seek your kind support by permitting our Engineering students numbering up to 62 and 3 senior faculty members accompanying them to visit your organization for obtaining useful inputs and guidance from the knowledgeable and experienced industrial personnel.

We will be grateful for your kind acceptance of this humble request and will be looking forward to your favorable response.

Thanking you in anticipation of an early and favorable response.

Dr. SHAKEER BASHA
Head of the Department
