2.3.1: Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences and teachers use ICT-enabled tool including online resources for effective teaching and learning process.

Avanthi Institute of Engineering & Technology provides an effective platform for students to develop latest skills, knowledge, attitude, values to shape their behavior in the correct manner. All departments conduct innovative programs which stimulate the creative ability of students and provide them a platform to nurture their problem-solving skills and ensure participative learning. The institute organizes annual technical fest in which students showcase their learning in the form of innovative projects. Also, students are motivated to participate in inter college as well as national level competitions.

Teachers actively use ICT tools for making power point presentations. Teachers also actively encourage students to take up online MOOCs courses that are given credits. In addition to the regular class work teaching methodology.

The institute focuses on the student-centric methods of enhancing lifelong learning skills of students. Faculty members make efforts in making the learning activity more interactive by adopting the below-mentioned student-centric methods.

- 1. Experiential Learning**
- 2. Participation Learning**
- 3. Problem-solving methodologies.**

1. Experiential learning

Experiential learning is the process of learning through Experience Hands-on learning can be a form of experiential learning. The students are taught and encouraged to practically test the concepts that they theoretically learnt in the classroom. The Faculty, Technical Staff helps the students to conduct experiments. Students are given time slots to do additional and entrancing experimental work. Students are also encouraged to do Internship with the industry during the academic semesters.

It encompasses:

1.1 Laboratory Sessions with advanced experiments.

1.2 Add-on Courses on latest technologies.

1.3 a) Internship to expand the knowledge on market trends.

b) Project Development.

PRINCIPAL

Gunthapally (V), Abdullapurmet (Mdl), R.R. Dist.

1.1 Laboratory Sessions with advanced experiments

Laboratories are the best way to provide experiential learning to the students. Laboratories provide first hands-on-working experience to the engineering students. Practical work carried out in the lab helps them become more knowledgeable, confident and improve their engineering skills. It enhances the experiential and problem-solving based learning in the students.

1.2 Value Added Courses on latest technologies

Add-on course is work added to the compulsory assignments, which is not necessary for each and every individual. These courses are a way to add extra credits in the student's to make him/her enhance grades and marks. Outcome of add-on course is to develop additional skill of the student for practical know ledge in various fields and provide an opportunity to go beyond their curriculum.

Certification Programs for Students

Value Added Course on PEGA Software for IVth year students

Add-on course Pega:- (Pega is a BPM tool that allows you to build scalable Customer Relationship Management (CRM), process automation, Case Management, and Artificial Intelligence (AI) apps, all on one unified platform. 1.3. Internship to expand the Knowledge on market trends:

- a) **Internships:** An internship is a professional learning experience that offers meaningful, practical work related to a student's field of study or career interest. An internship gives a student the opportunity for career exploration and development, and to learn new skills.
- b) **Project Development:** Engineering projects are an excellent way to incorporate your theoretical knowledge into practicality. Projects offer the opportunity to apply and extend material learned throughout the program. Assessment is by means of a seminar presentation, submission of a thesis, and a public demonstration of work undertaken.
- c) **Community Service Project:** Community Service Project is an experiential learning strategy that integrates meaningful community service with instruction, participation, learning and community development. It involves students in community development and service activities and applies the experience to personal and academic development. It is meant to link the community with the college for mutual benefit. The community will be benefited with the focused contribution of the college students for the village/ local development. The college finds an opportunity to develop social sensibility and responsibility among students and also emerge as a socially responsible institution. Percentage of students undertaking project work/field work/internships (Data for the latest completed academic year).

2. Participative Learning

In this type of learning, students participate in various activities such as seminar, group discussion, wall papers, projects, and the skill based add on courses. Students are encouraged to participate in activities where they can use their specialized technical or management skills, such as

2.1 Seminars/Presentations

2.2 Industrial Visits

2.3 Student club activities

2.4 Role Play

2.5 Brainstorming session

2.6 Guest Lectures

2.7 Project Exhibitions

2.8 Work shops

2.9 Mock Interview

2.10 Group discussion

2.11 Case Study

2.1. Seminars/Presentations

A "Seminar" is a meeting for discussion or training. In the academic sphere, a seminar is a class at a university or a college where a small group of students and a teacher discuss a particular topic. Presentation is the way in which something is offered, shown, or explained. A seminar is an informal talk about your findings or research. So a seminar presentation can be defined as a small group of persons in a class or in an organization assembled to have an exchange of views on a particular topic. The participants express their views on the given topic in an informal way. So a seminar is a very enlightening and effective information sharing process. Holding a seminar is a teaching-learning process.

2.2. Industrial Visits:

Industrial visit are an essential part of the academic curriculum in most of the Graduate and Post graduate courses. Being a part of interactive learning, such educational visits give students a major exposure to real working environments along with practical perspective of a theoretical concept relevant to their domain which lead the students to understand better management skills, leadership skills, team player attitude, etc.

Dear Sir,

Greetings from the Centre for Development of Advanced Computing (C-DAC)

Kindly refer to our telephone conversation on the above subject

C-DAC is the premier R&D organization of the Ministry of Electronics and Information Technology (MeitY), Government of India carrying out Research and Development (R&D) in IT, Electronics, and associated areas.

C-DAC Hyderabad centre is actively contributing to Cyber Security, Blockchain Technology, Quantum Computing, Strategic Electronics, Embedded Systems & Internet of Things (IoT), Educational Technologies, Software Technologies, etc. The centre is involved in R&D, Product/Solution development, Services, and Capacity Building and Skilling activities. As part of C-DAC Hyderabad Silver Jubilee celebrations, we are organizing a Tech Show on Saturday 30.09.2023 for the engineering students and faculty.

Timing - 2 PM to 4 PM (Time Slot Given to Avanathi Institute of Engineering & Technology)

Activate Windows

Industrial Visit to COCO-COLA company By MBA students

The visit started with a cool welcome in the form of a fridge full of Coca Cola drinks for everyone. The students were then asked to visit a wall where fun facts about the main products of the company were presented in an attractive manner. After a brief video highlighting the facts about the company, the excited visitors were taken to various sections of the plant where they were explained the functioning and the processes which the students were able to see directly as well. The students asked countless questions about the drinks and the processes along with the controversial issues related to the products which were responded with facts and pleasure. The representatives showed and gave information about the various shapes of the bottles of Coca Cola since its introduction and their respective reasons. The last phase of the visit was a brief about the various CSR initiatives which the company has undertaken.

Industrial Visit TO BSNL for IInd year ECE students

For IInd year ECE students an Industrial Visit to BSNL was conducted. The Sub divisional engineer of BSNL divided the students into three groups and each group were thought about different modules namely switching, transmission and MDF (Main distribution function). In switching module, students learnt on practical aspects of call making and receiving. They were thought on how to create the calling number and how to check the dial tone. In transmission module, students were briefed about OFC communication and its uses, advantages, applications. The students were shown the real cables and its working procedure. In the MDF module, students learnt about the requirement of main distribution function. They were briefed about line side and exchange side of MDF.

2.4. Role Play

Role play exercises give students the opportunity to assume the role of a person or act out a given situation. Role plays engage students in real-life situations or scenarios that can be "stressful, unfamiliar, complex, or controversial" which requires them to examine personal feelings toward others and their circumstances. Role plays can be effectively used in the classroom to provide real world scenarios to help students learn.

Role Play activity on interview skills by CSE students

Role plays activity on Formal and Informal by ECE students

Gunthapally (V), Abdullapurmet (M), R.R. Dist.

2.5. Brainstorming sessions

Brainstorming is a group problem-solving method that involves the spontaneous contribution of creative ideas and solutions. This technique requires intensive, freewheeling discussion in which every member of the group is encouraged to think aloud and suggest as many ideas as possible based on their diverse knowledge. Brainstorming will offer better solutions to a community issue or proposal because a wider range of options has been canvassed.

Think share Activity by the students

2.6. Guest Lectures:

Guest Lecture is a concept that helps the students to enhance their knowledge. Many students love the concept of guest lecturers as it is an interesting way of learning and interacting with new people at the same time. Such events and lectures help in enhancing the communication skills and many other skills of the students.

Guest Lecture was conducted for JAVA Programming – II/II CSE students by Dr. A. Nagasri Asso.Professor – CSE Dept, Annamacharya Institute of Engineering and Technology.

2.8. Workshops

A workshop is an interactive meeting in which a group of people goes through a series of activities to achieve to solve a problem or work on a project. Workshops are often led by a facilitator and can range from a couple of hours to multiple days. This is our go-to definition of a workshop. The expected outcome is increased knowledge, competence, or confidence in a particular area or set of techniques.

2.9. Mock interview

A mock interview is an interview which you practice before the actual interview. It can be practice weeks or days before with your friends, or mentor. It provides the students an opportunity to practice, receive feedback and improve their skills. A mock interview also helps you develop interview strategies, enhance your communication skills, answer challenging questions, and ease the nerves that many experiences before an actual job interview.

2.10. Group discussion

The main purpose of a group discussion is to measure group communication skills. Group communication skills deal with how a person in a group is able to communicate with other persons and influence his/her idea on others. Group discussions promote a deeper understanding of a topic and increase long-term retention. Group discussions can also help increase participants attention and help maintain their focus by involving them in the learning process. Group discussion can also provide feedback to instructors on participant comprehension.

2.11. Case Study

Case studies provide students with scenarios in which they can begin to think about their understanding and solutions to problems found in real-world situations. When carefully planned, case studies will challenge students' critical thinking and problem solving skills in a safe and open learning environment.

3. Problem solving methodologies

Faculties are conducting subjects of highly analytical nature, with the objective to increase problem solving capabilities, analytical thinking and logical ability. Faculties are support to the students to attempt and solve problems individually and independently for the tutorial session, a class is divided into two groups and faculty members are assigned to each group separately. Giving assignments and quizzes at the end of instruction of each unit All academic activities are aimed at elevating the students' knowledge, skills and build confidence in them.

3.1 Tutorials based on problems

3.2 Assignments

3.1 Tutorials

Tutorials will provide a forum for students to practice their independent analysis of the primary texts, and to review and respond to the theoretical interpretations presented during lecture.

Sample copies of Tutorial Assignments

TUTORIAL CLASS ON MATHEMATICS

Write the following statement in symbolic form with statements.

① P: Pawan is Rich
Q: Raghav is happy.

a) Pawan is Rich and Raghav is not happy.

Ans:- $P \wedge \neg Q$.

b) Pawan is Not Rich and Raghav is happy.

Ans:- $\neg P \wedge Q$.

2) P: Raj is Rich
Q: Raj is happy.

a) Raj is poor but happy :

Ans:- $\neg P \wedge Q$.

PRINCIPAL
Avanthi Institute of Engg. & Tech
Gunthapally (V), Abdullapurmet (M), RR Dist.

TUTORIAL CLASS ON MATHEMATICS

4) Write the following into a statement :

English

P: Triangle ABC is isosceles.

Q: Triangle ABC is equilateral.

R: Triangle ABC is equiangular.

1) $Q \rightarrow P$.

Ans: If triangle ABC is equilateral, then it is isosceles.

2) $\neg P \rightarrow \neg Q$

Ans: If the triangle ABC is not isosceles then it is not equilateral.

3) $Q \Leftrightarrow R$.

Ans: The triangle ABC is equilateral if and only if it is equiangular.

4) $P \wedge \neg Q$.

Ans: Triangle ABC is isosceles and triangle ABC is Not Equilateral. ans.

5) $R \rightarrow P$.

Ans: if triangle ABC is Equiangular, then it is isosceles.

PRINCIPAL
Avanthi Institute of Engg. & Tech
Gunthapally (V), Abdullapurmet (M), R.R. Dist.

TUTORIAL CLASS ON MATHEMATICS

5) If P, Q, R are three statements with truth values 'true', 'true' and 'false' respectively. Find the truth values of the following

Given P : TRUE
Q : TRUE
R : FALSE

a) $P \vee Q$ Ans: $T \vee T \rightarrow T$

b) $P \wedge R$ Ans: $T \wedge F \rightarrow F$

c) $(P \vee Q) \wedge R$ Ans: $(T \vee T) \wedge F$
 $T \wedge F \rightarrow F$

d) $P \wedge (\neg R)$ Ans: $T \wedge (\neg F)$
 $T \wedge T \rightarrow T$

e) $(\neg P \wedge \neg Q) \wedge (\neg R)$ Ans: $(\neg T) \wedge (\neg T) \wedge (\neg F)$
 $(F \wedge F) \wedge T$
 $F \wedge T \rightarrow F$

f) $P \rightarrow R$ Ans: $T \rightarrow F$
F

g) $P \rightarrow Q$ Ans: $T \rightarrow T$
T

h) $R \rightarrow P$ Ans: $F \rightarrow T$
T

i) $(R \wedge P) \rightarrow Q$ Ans: $(F \wedge T) \rightarrow T$
 $F \rightarrow T$
T

j) $(P \wedge \neg Q) \rightarrow R$
Ans: $(T \wedge \neg T) \rightarrow F$
 $(T \wedge F) \rightarrow F$
 $F \rightarrow F \Rightarrow T$

3.2 Assignments

An assignment is a piece of (academic) work or task. It provides opportunity for students to learn, practice and demonstrate they have achieved the learning goals. It provides the evidence for the teacher that the students have achieved the goals.

ENGINEERING
MECHANIC'S
ASSIGNMENT
II

Name :- G. Vignesh
Roll No :- 21065A0213
Standard :- 2nd year, 1st Sem, B. Tech
College :- AVSH, Gunthapally.

PRINCIPAL
Avanathi Institute of Engg. & Tech.
Gunthapally (V), Abdullapurmet (M), R.R. Dist.

1. Derive the moment of Inertia of Rectangle, triangle and circle with respect to References and centroidal axis.

Ans:-

1. MOMENT OF INERTIA OF A RECTANGLE :-

Consider a Rectangle of length (b), width (d) is represented along two dimensional axis as shown in below fig. Let assume a small Rectangular element inside the Rectangle which is at a distance of y from x -axis and width dy as shown in fig.

Area of small Rectangular element.

$$dA = b(dy)$$

w.r.t x -axis :-

$$I_x = \int y^2 b dy$$

$$= b \left[\frac{y^3}{3} \right]_0^d$$

$$I_x = \frac{bd^3}{3}$$

Figure

w.r.t y -axis :-

Area of small element, $dA = d(dx)$

$$I_y = \int x^2 dA$$

$$I_y = \int_0^b x^2 dx$$

PRINCIPAL
Avanathi Institute of Engg. & Tech
Gunthapally (V), Abdullapurmet (Md), R.R. Dist.

$$I_y = d \left[\frac{x^3}{3} \right]_0^b$$

$$I_y = \frac{db^3}{3}$$

By Parallel axis Theorem:-

with respect to x-axis

$$I_x = I_{x\bar{x}} + Ay_c^2$$

$$\Rightarrow \frac{bd^3}{3} = I_{x\bar{x}} + bd \left(\frac{d}{2} \right)^2$$

$$\Rightarrow I_{x\bar{x}} = \frac{bd^3}{3} - \frac{bd^3}{4}$$

$$I_{x\bar{x}} = \frac{bd^3}{12}$$

Figure

Similarly w.r. to y-axis :-

$$I_{y\bar{y}} = \frac{db^3}{12}$$

2. Moment of a Triangle :-

Consider a triangle of base 'b' and height 'h' represented along horizontal x-axis and vertical y-axis to determine moment of inertia of a triangle. Let assumed a small rectangular element of length 'b' and width 'dy' which is at a perpendicular distance of x, y w.r.t y and x-axis as shown in figure.

Area of Rectang Triangle element, $dA = b, dy$

We know that $I_x = \int y^2 dA$

$$= \int_0^h y^2 b, dy$$

Assume two Δ s are similar by Properties of Similar triangles.

Figure

$$\Rightarrow \frac{b_1}{h-y} = \frac{b}{h}$$

$$b_1 = \frac{b}{h} (h-y)$$

$$\therefore I_x = \int_0^h y^2 \frac{b}{h} (h-y) dy$$

$$I_x = b \left[\frac{y^3}{3} - \frac{y^4}{4} \right]_0^h$$

$$I_x = b \left[\frac{h^3}{3} - \frac{h^4}{4h} \right]$$

$$I_x = b \left[\frac{4h^3 - 3h^3}{12} \right]$$

By Properties of Δ s $b_1 d (h-y) = b h$

$$I_x = \frac{bh^3}{12}, \text{ Similarly}$$

$$I_y = \frac{hb^3}{12}$$

3. Moment of Inertia of a Semi-circle :-
(i)

Consider a Semi-circle of a radius (r) Represented in a co-ordinate System as shown in below figure.

$$I_{\text{Semicircle}} = \frac{1}{2} \times I_{\text{circle}}$$

$$I_{\text{semicircle}} = \frac{\pi D^4 / 64}{2}$$

$$I_{\text{semicircle}} = \frac{\pi D^4}{128}$$

$$I_x = \frac{\pi D^4}{128} \text{ (or) } \frac{\pi R^4}{8}$$

By Parallel axis Theorem :-

$$\Rightarrow I_x = I_{x\bar{x}} + Ay_c^2$$

$$\therefore I_x = \frac{\pi R^4}{8} \text{ [M.I of Semi circle]}$$

$$\Rightarrow \frac{\pi r^4}{8} = I_{x\bar{x}} + \frac{\pi r^2}{2} \left[\frac{4r}{3\pi} \right]^2$$

$$\Rightarrow I_{x\bar{x}} = \frac{\pi r^4}{8} - \frac{\pi r^2}{2} \cdot \left(\frac{16r^2}{9\pi^2} \right)$$

$$\Rightarrow I_{x\bar{x}} = r^4 \left[\frac{\pi}{8} - \frac{8}{9\pi} \right]$$

$$\rightarrow \boxed{I_{x\bar{x}} = 0.11 r^4}$$

(ii) Moment of a Quarter circle :-

Consider a Quarter circle of radius (r) represented in a Co-ordinate system as shown in below figure

$$I_{\text{Quarter circle}} = \frac{1}{4} \times I_{\text{circle}}$$

$$I_{\text{(Q-circle)}} = \frac{1}{4} \times (I_{\text{circle}}) \times r$$

$$I_{\text{Quarter circle}} = \frac{1}{4} \times \frac{\pi R^4}{4}$$

$$I_{\text{Quarter circle}} = \frac{\pi r^4}{16} \quad \text{or} \quad \frac{\pi d^4}{256}$$

By Parallel-axis Theorem :-

$$I_x = I_{x\bar{x}} + Ay\bar{c}^2$$

$$\therefore I_x = \frac{\pi r^4}{16}$$

$$\frac{\pi r^4}{16} = I_{x\bar{x}} + \frac{\pi r^2}{4} \left(\frac{4r}{3\pi} \right)^2$$

$$I_{x\bar{x}} = \frac{\pi r^4}{16} - \frac{r^2}{4} \left[\frac{16r^2}{9\pi^2} \right]$$

$$I_{x\bar{x}} = r^4 \left[\frac{\pi}{16} - \frac{4}{9\pi} \right]$$

$$I_{x\bar{x}} = 0.055 r^4$$

2. State and Prove that parallel axis theorem :-

Sol: Statement :- The moment of Inertia about any references axis is equal to the algebraic sum of the moment of Inertia about it's centroidal axis and product of Area of the body and distance between the body and the References axis.

Proof :-

w.r.to z-axis :-

$$I_x = \int y^2 dA$$

$$I_x = \int (y + y_c)^2 dA$$

$$I_x = I_{x\bar{x}} + \int y_c^2 dA + 2 \int y \cdot y_c dA$$

$$I_x = I_{x\bar{x}} + A y_c^2$$

Similarly w.r.to y-axis

$$I_y = I_{y\bar{y}} + A x_c^2$$

Since the first moment of inertia about it's about centroidal axis is zero so $\int y \cdot y_c dA$ is zero.

4. ICT Based Learning:

Today, it is essential for the students to learn and master the latest technologies in order to be corporate ready. As a consequence, teachers are combining technology with traditional mode of instruction to engage students in long term learning. College uses Information and Communication Technology (ICT) in education to support, enhance, and optimize the delivery of education.

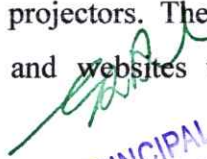

The following tools are used by the Institute-

ICT Tools:

1. Projectors- 25 projectors are available in different classrooms/labs
2. Desktop and Laptops- Arranged at Computer Lab and Faculty cabins all over the campus.
3. Printers- They are installed at Labs, HOD Cabins and all prominent places
4. Photocopier machines - Multifunction printers are available at all prominent places in the institute. There are four photostat machines available in campus.
5. Scanners- Multifunction printers are available at all prominent places.
6. Seminar Rooms- Three seminar halls are equipped with all digital facilities.
7. Smart Board- One smart board is installed in the campus.
8. Auditorium- It is digitally equipped with mike, projector, cameras and computer system.
9. Online Classes through Zoom, Google Meet, Microsoft Team, Google Classroom)
10. MOOC Platform (NPTEL, Coursera, SAP, Udemy, Edx etc)
11. Digital Library resources (DEL NET, MYLOFT etc)

Use of ICT By Faculty-

- A. PowerPoint presentations- Faculties are encouraged to use power-point presentations in their teaching by using LCD's and projectors. They are also equipped by digital library, online search engines and websites to prepare effective presentations.

- B. Industry Connect- Seminar and Conference room are digitally equipped where guest lectures, expert talks and various competitions are regularly organized for students.
- C. Online quiz- Faculties prepare online quiz for students after the completion of each unit with the help of GOOGLE FORMS.
- D. Video Conferencing- Students are counseled with the help of Zoom / Google meet applications.
- E. Video lecture- Recording of video lectures is made available to students for long term learning and future referencing.
- F. Online competitions- Various technical events and management events such as Poster making, Ad-mad show, Project presentations, Business quiz, Debates, paper presentations etc. are being organized with the help of various Information Communication Tools.
