ABOUT THE COURSE

The Four Skills to Master For both native speakers and ESOL speakers, strong communication in English involves four modes: reading, writing, speaking, and listening. Different people have naturally differing aptitudes for these skills

COURSE OBJECTIVES

To facilitate computer-aided multi-media instruction enabling individualized and independent language learning

- > To sensitize the students to the nuances of English speech sounds, word accent, intonation and rhythm
- > To bring about a consistent accent and intelligibility in their pronunciation, ample speaking opportunities are provided.
- > To improve the fluency in spoken English and neutralize mother tongue influence
- > To train students to use language appropriately for interviews, group discussions and public speaking

EXPECTED OUTCOMES

- Learning with precision through computer-assisted individualized and independent language learning to work independently in engineering set up.
- Improved conversational reception and articulation techniques in the course of repetitive
- instruction thereby gaining confidence both in institutional and professional environment.
- Accuracy in pronunciation and restoring Standard English thereby crafting better command in English language so that the students have a cutting edge over others in society.
- Imbibing appropriate use of language in situations to work as an individual and as a leader in diverse teams

ABOUT THE COURSE

C is a middle-level language as it binds the bridges between machine-level and high-level languages. Java is a high-level language as the translation of Java code takes place into machine language, using a compiler or interpreter. Compilation and Interpretation. C is only compiled and not interpreted.

COURSE OBJECTIVES

- To understand the basic concepts and fundamentals of platform independent object oriented language.
- To demonstrate skills in writing programs using exception handling techniques and multithreading.
- To understand streams and efficient user interface design techniques

EXPECTED OUTCOMES

After successful completion of the course, the students are able to

- Use the syntax and semantics of java programming language and basic concepts of OOP.
- Develop reusable programs using the concepts of inheritance, polymorphism, interfaces and packages.
- Apply the concepts of Multithreading and Exception handling to develop efficient and error free codes.
- Design event driven GUI and web related applications which mimic the real word scenarios.

By the end of the course, you should be able to use MATLAB for problem-solving in science and engineering, where mathematical expressions are used extensively. You should also be able to create your own scripts and functions to automate your work.

COURSE OBJECTIVES

- 1 Understanding the MATLAB environment
- 2 Being able to do simple calculations using MATLAB.
- 3 Being able to carry out simple numerical computations and analyses using MATLAB.

EXPECTED OUTCOMES

- Ability to use MATLAB for interactive computations.
- Familiarity with memory and file management in MATLAB.
- Ability to generate plots and export them for use in reports and presentations.
- Ability to program scripts and functions using the MATLAB development environment.
- Ability to use basic flow controls (if-else, for, while)
- Familiarity with strings and matrices and their use
