REPORT ON "POLLUTION FREE ZONE CAMPUS"

Date: 16-05-2023

From 2018 to 2023

With an increasing number of automobiles on campus, many colleges face a severe parking shortage. To avoid such kind of issues, the institution provides a generous parking space for two wheeler and four wheeler vehicles for the students and staff in the college premises. The parking zone is situated near the academic block. Those who park their vehicles have to observe certain rules and restrictions for safety purposes.

The volume of plastic produced in the world has increased significantly and an increasing amount of plastic litter ends up in terrestrial and aquatic eco system. To avoid this, the students of AIET, initiated and participated actively in different campaigns by giving the slogan "Say No to Plastic" to check plastic litter that is hazardous to the terrestrial and marine environment. Because plastics are durable, buoyant, waterproof, indigestible and non-biodegradable.

In particular, plastic carry bags are the biggest contributors of littered waste, and every year, millions of plastic bags end up in the environment in soil, water bodies, water etc. and it takes an average of one thousand years for the plastic to decompose completely. In this regard, the students of B.Tech. conduct awareness programs with the slogan 'Say No to Plastic and raise awareness of the community to keep the earth clean and pollution free.

AIET ensures that its premises are free from air, noise and soil pollution. Strict rules and regulations are framed to make the visitors to the campus observe these rules. Littering in the campus is strictly prohibited. The institute has a sound waste disposal and management policy in place.

REPORT ON "SAY NO PLASTIC"

Date: 22-5-2023

From 2018 to 2023

Avanathi Institute of Engineering and Technology regularly organizes awareness programs on environment related issues. The NSS wing of the college is at the fore-front of organizing such programs. Programs like "Say No to Plastic concentrate on the harmful effects of plastics and have the theme "Say no to plastic bags". This program highlights plastic bags as a threat to our environment because a single plastic bag takes up to 1000 years to decompose as it contains non-renewable petrochemicals. The students and faculty raise the slogans "Plastic bag is a death bag & Plastic is a parasite that is causing the downfall of our environment".

The government has decided to take plastic ban as a national level campaign to address the environmental hazards. In this regard, our institution has also joined hands to bring about changes in the environment and save the lives of not only human beings but also other living creatures. NSS volunteers actively participate in this program. Say No to Plastic rallies are held on such occasions. Through these programs, the students are made aware of the consequences they have to face because of using plastics. The program focuses on the following points:

1. Ban the use of single use plastics on the campus.
2. Avoid bringing Non degradable plastic items to the institution.
3. Avoid use of plastic bottles and encourage use of alternatives like cloth bags, paper bags etc., instead of plastic water bottles, bags, covers and other plastic goods on the campus.

Banners bearing this slogan are displayed at various places in the locality. The Students and staff members visit the local villages and tell the villagers how the use of polythene bags pollutes the environment. They are also educated that polythene is not biodegradable and that these bags could choke the sewers. They could also affect the fertility of the soil. The shopkeepers in the locality are requested to give up the use of polythene carry-bags.

People show great interest in the campaign. Many of them promise never to use polythene bags in future. The campaigns are a great success. Everyone in the locality praises the initiative undertaken by the NSS unit of Avanathi Institute of Engineering and Technology. All the students and staff members take initiatives to protect and preserve our environment.
